

Ring Size Guide

Please print out this guide ensuring that you **DO NOT** select 'shrink page' or 'fit to page', or the sizes below will not be accurate.

Virtue Stackable Rings

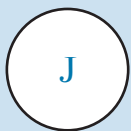

It is best to measure your finger when you are warm and towards late afternoon or evening.

For stacking rings you may wish to consider the next size up to allow a more comfortable fit depending on how many rings you stack.

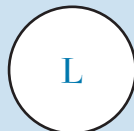

In most instances your finger size will be bigger on the hand you use the most.

Place your ring over the circles below to find your size.

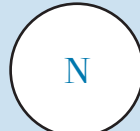

Line the inside of the ring up with the outside of the circle. If you are in-between sizes, I would recommend the next size up.

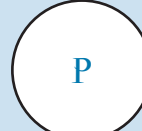

15.4mm

16.1mm

16.92mm

17.75mm

18.19mm
